

## **MOONBUGGY FEATHERWEIGHT AWARD**

**(Replace the Most Unique Award)**

2011 NASA Marshall Great Moonbuggy Race

Weighing of the Moonbuggies will take place in the folded configuration. The High School and College Moonbuggies with the lowest product of weight (pounds) multiplied by completed runtime (seconds) will be the winners. Safety must not be compromised in Moonbuggy design in order to achieve light weight. If a Moonbuggy is judged to be unsafe, it will not be permitted to race.
